

Some interesting Photographs

Above – Chinese family on Ural outfit – BBC
(Before birth control)

Right – “If I wait here, perhaps Dad will get a move on and put the motor back in, then we can go!”

Ural with standing rider about to be overtaken by racing cyclist!

“Never touch the front brake on left handers, tooooo late!”

A nice cast Dnieper front wheel (UK).

Some Interesting Customisations

The Soviet stamp on the right was kindly sent to me by Wallace Brooks of the USA, very interesting.

Всё, старый знакомый! Этот «Триумф» 1957 года выпуска не только неоднократно бывал в Риге, но жёстко и в Москве [см. «Мото» № 3 за 1983 г.].

Ещё один реликв советских времён — экспериментальный «М-31», разработанный в Серпухово в середине 50-х годов. Мотоцикл имеет одиннадцатидесятилитровый четырёхтактный 350-кубовый двигатель и привод на заднее колесо карданным валом.

Photo above described as a M31, interesting!

Jonathan Smith from Norfolk England 1992 – food for thought! (Neval MT10-36)

Ural M67 lamp, purchased in France 1990

Dnieper cast metal model, made in USSR 1977

Sample of the cast metal medal from KMZ to celebrate the 1,000,000th Dnieper produced in 1979. Presented to me by Soviet trade representatives on one of their visits to England. True size – 6cm diameter.

BMW frames are not made like they used to be – aah shame!
